TWELVE SPRINGS RANCH, LIVINGSTON, MONT.

FABRICATOR/INSTALLER: Mike Winters, Bozeman, Mont.

GENERAL CONTRACTOR: T-Y Construction, Big Timber, Mont.

ARCHITECT: Scott Hirschman, Carmel, Ind.

PRODUCT: Revere Freedom Gray 16-ounce copper

STYLE: 1-inch double-lock standing seam

Freedom Gray copper — 24,000 pounds of it — was chosen at the recommendation of Mike Winters because of the extreme weather conditions in Big Sky Country. The temperature can be 95 in the summer, 45 below zero in the winter, and the winds can blow 60 mph sustained with gusts over 100 mph. A rich gray finish on malleable material was the ultimate goal and Freedom Gray best fits this spec.
