PRODUCT: Ideal Roofing H-F 20.25 panels
(21,000 square feet)

FINISH: Galvalume Plus

MATERIAL: 24-gauge Galvalume

Designed as a roofing panel for high-end, prestigious residential and commercial buildings, Ideal's H-F 20.25 steel roof panels brought back the rich traditional style and appearance of standing seam roofs without the need for clips or a seamer. The architecturally pleasing hidden fastener panel can be installed over solid decking, or over steel or wood purlins through oval slots with Ideal's specially designed fastening screws, allowing the panel to slide during contraction or expansion.
