

## project: boathouse

**BOSTON UNIVERSITY DEWOLFE BOATHOUSE, BOSTON, MASS.**

...

**ROOFING INSTALLER:** Gilbert and Becker, Dorchester, Mass.

**ARCHITECT:** Architectural Resources Cambridge, Cambridge, Mass.

**PRODUCT:** Revere EverGreen, Traditional standing seam, contractor-formed batten seam roofing

**MATERIAL:** Pre-patinated copper

The owner chose Revere EverGreen pre-patinated copper as a final complement for this Boston University project. The natural patina accentuates the harmony between nearby buildings and at the same time, offers a pleasant contrast to the unique design elements of the Boathouse itself. With the proven durability of copper, the Boathouse is sure to remain a landmark on the Charles River.

For more information on products from Revere Copper, see page 58
