

## project:gazebo

IOWA RIVER GAZEBO, CORALVILLE, IOWA

...

**INSTALLER/GENERAL CONTRACTOR:**

All American Concrete, West Liberty, Iowa

**DESIGNER:** RDG Planning & Design, Des Moines, Iowa  
and NNW Inc., Iowa City, Iowa

**PRODUCTS:** AEP Span HR-36 exposed fastener panel,  
curved by Curveline

**FINISH:** Cool ZACTique II • **MATERIAL:** 24-gauge steel

The Iowa River Gazebo is a trail rest stop that overlooks the river and incorporates several free-standing exhibits and historical displays. The gazebo's arched metal roofs link the structure to the arches of the pedestrian bridge that crosses the Iowa River and connects the Iowa City peninsula to the Coralville riverfront. Framing and roofing materials were prefabricated for fast and easy assembly at the project site using hidden bolt connections.

The curved roof panels were fastened directly to the steel tube framing with no need for a sub-roof.
